

# STEYR AUG 9mm

STEYR AUG 9 mm

Designed for operations where caliber 9 mm is the best choice. No other 9 mm weapon gives such accuracy with high hit probability as the AUG 9 mm carbine. High accuracy is achieved by 420 mm barrel which gives a higher muzzle energy.

The closed bolt firing system gives the extra edge in accuracy and safety. The barrel is threaded to accept various silencers. With an optional muzzle device CS and CN rifle grenades may be launched. A bayonet holder is also available.

- "Bull Pup" design - short overall length
- optical sight with ring reticule - extremely high hit probability
- utmost training simplicity
- highest operational versatility

# STEYR AUG 9mm
